Case 1293

**ASSIGNMENT OF APPLICATIONS FOR LETTERS PATENT AND
OTHER INVENTIONS**

THIS ASSIGNMENT OF APPLICATIONS FOR LETTERS PATENT AND OTHER INVENTIONS (this "Assignment") is made this 26th day of February, 2003, by PACKET DESIGN, LLC, a Delaware limited liability company (the "Transferor"):

WITNESSETH:

WHEREAS, the Transferor is the sole owner of the entire right, title and interest in, to and under the national and multinational statutory invention registrations, the patent applications and other inventions listed in Schedule A (including all reissues, divisions, continuations, continuations-in-part, extensions and reexaminations thereof) registered or applied for in the United States and all other nations throughout the world; all improvements to the inventions disclosed in each such registration or patent application; all rights in all of the foregoing provided by treaties, conventions and common law and all rights to sue or recover and retain damages and costs and attorneys' fees for past, present and future infringement or misappropriation of any of the foregoing (collectively, the "Inventions").

WHEREAS, PRECISION I/O, INC., a Delaware corporation (the "Transferee"), is desirous of acquiring the entire worldwide right, title and interest in, to and under the Inventions.

WHEREAS, for United States federal income tax purposes, it is intended that this Assignment be treated as part of a transfer subject to Section 351(a) of the Internal Revenue Code of 1986, as amended.

NOW, THEREFORE, in consideration of the Transferee's issuance of certain shares of its Series A Preferred Stock, and pursuant to the Stock Purchase Agreement dated as of February 26, 2003 (the "Agreement") between the Transferor and the Transferee, the Transferor does hereby sell, assign, transfer, set over and convey unto the Transferee, as of the date first above written, all of the Transferor's right, title and interest in, to and under the Inventions.

ALL OF THE FOREGOING to be held and enjoyed by the Transferee for its own use and for the use of its successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by the Transferor if this transfer to the Transferee had not been made. The Transferor agrees to provide testimony, at the Transferee's expense, at any time in connection with any proceedings affecting the right, title, interest or benefit of Transferee in, to or under the Inventions and to execute and deliver upon request of the Transferee such additional documents as are necessary or desirable to give full effect to and perfect the rights of the Transferee under this Assignment.

Transferee agrees, at its own expense, to defend or at its option to settle any claim or action brought against Transferor, and each of its directors, officers and service members (each an "Indemnitee") as a result of Transferee's or any of its licensees' or sublicensees' use of the Inventions, and to indemnify each Indemnitee against any and all damages and costs, including legal fees, that a court awards against the Indemnitee, that are paid in settlement in accordance with this paragraph, or that the Indemnitee otherwise incurs in the defense of such claim or action; provided that the Indemnitee provides Transferee with (i) prompt written notice of such claim or action, (ii) sole control and authority over the defense or settlement of such claim or action, and (iii) proper and full information and reasonable assistance to defend and/or settle any such claim or action. Each Indemnitee shall have the right to consult with and be represented by counsel of their own selection, at the Indemnitee's own expense, in connection with such claim. Notwithstanding the foregoing, Transferee shall not enter into any settlement, admit any liability on behalf of any Indemnitee, or consent to any adverse judgment that would adversely affect the rights, interest or business of any Indemnitee without the prior written consent of the Indemnitee.

IN WITNESS WHEREOF, the Transferor has caused this Assignment to
